# *Welcome to Edmon's...*

## *Hand-carved Craftsmanship*

Edmon's is a fourth generation family owned and operated business. We specialize in custom made, hand-carved wood and cast stone mantles and overmantles. All the wood mantles featured in the catalog are custom made. Any size, any wood, any finish or we can supply unfinished.

The family of Edmon's insists on providing not only quality craftsmanship, the finest of materials and timely deliveries but also exceptional service. The passion of our artisans matched with the design skills of the Edmon's family has created the products that have earned us our unsurpassed reputation in the design, architecture and entertainment industries. The end result, we are the largest company in the United States specializing in custom made fireplace mantles!

Edmon's mantles are made of the finest grades of hard and soft woods. They are especially weather-treated to prevent expansion or shrinkage through the changing seasons, allowing the wood to keep its integrity and beauty over time.

We have proudly maintained the rare tradition of carving each and every wood piece by hand. A work of art, each Edmon's mantle is carved by our craftsmen, using special chisels and years of experience to bring out the unique character of each. Our Artisans are like musicians, who never play a song quite the same way twice.

Our creations embody hundreds of years of artistry and reflect the riches of historical tradition. We have many beautiful designs to choose from and also welcome designs and sketches to create your "one of kind" custom mantel. We also specialize in unique custom wood furniture as seen in our catalog.

All of our pieces are Proudly Made in the USA and manufactured at our Melrose Avenue location in Los Angeles. Using our own installers and fleet of trucks, we offer installation in California, Nevada and Arizona. For any other State or Country, all pieces are professionally and individually crated and shipped.

We invite you to tour our block-long factory, view our artisans at work and visit our showroom at 5174 Melrose Avenue, Los Angeles.

Edmon Simonian, owner and founder of Edmon's Unique Furniture and Stone Gallery Inc. was born in 1941 in the country of Armenia. At the age of 9 months he was stricken with polio which left him permanently handicapped in his right leg. He is the fifth generation from his family specializing in design, hand craftsmanship and hand carving.

At the age of 5 he started as an apprentice practicing the delicate art of designing, carving and manufacturing intricate pieces of wood furniture under the careful supervision of his father and grandfather. Edmon is the fourth generation from his family specializing in hand craftsmanship and hand carving.

In his youth he spent many months in Italy studying the architecture and details which he later incorporated into his works. In 1976 at the age of 35 Edmon immigrated to the United States with his wife and daughter bringing with him his art and talent.

Edmon's Unique Furniture and Stone Gallery was established in Los Angeles in 1978. Edmon's has grown and prospered from being a small corner shop to occupying an entire city block on Melrose Avenue housing the showroom and factory. Edmon's is a well known name, nationwide in the field of design as well as the motion picture and television industries.

Many ask to see the artisans at work. Every single item is built from scratch by artisans who have been with the company for over 20 years. This request is always welcome.

Edmon's is an established company offering it's unique and one of a kind product to homeowners. At the age of 65 Edmon is still the head of his establishment, designing and supervising, along with his wife who has been his companion not only throughout his life but also throughout his business. The team has grown and his children are now a very large and vital part of the family owned and operated business.

# *Overmantles*

Each and every custom mantle has its own matching mirror frame or panel frame. The samples below illustrate the different shapes of mantles and the corresponding styles that match them. The carving done on the overmantles are custom and therefore match the selected mantle. Each and every over mantle can either be made with a raised panel center or a 1½" beveled mirror. In many cases a plasma/LCD television (as shown on ED-18F) or painting is embedded in the panel.

Dear Edmon,

*Thank you very much for the exceptional wood working you provided in the restoration of the Library of the United States Treasury. It's hard to distinguish between the original woodworking and your reproductions. The craftsmanship and quality is beyond superb and has exceeded our expectations.*

Sincerely,  
David Parker, AIA

Dear Edmon,

*I still marvel over the absolutely elegant and beautifully artistic job that you did on the carvings for the bar. I have come to expect superb work from you, but you even outdid yourself on this one! It will be a joy to me for all of my life.*

*Thank you also for all the extra effort you put forth in bringing it to Las Vegas, and making sure that everything fits properly.*

*Again, thank you my friend for your great artistry, for your special thoughtfulness, and for your friendship.*

Fondly,

# Edmon's
